# Flotilla - Motor

PIM036

The Motor module is a 298:1 ratio motor that has full speed control, and is bi-directional. It's perfect for driving robots, as a tiny fan, or in LEGO® projects. We have a LEGO® compatible axle adaptor available too!

Features:

- 298:1 ratio motor
- DRV8830 motor driver cip
- Full speed control
- Bi-directional
- Micro USB connector

Find Flotilla Cookbook recipes that use the Motor module at http://learn.flotil.la/cookbook/ or use Motor with Rockpool at http://flotil.la/rockpool/

Or use our Python Flotilla API to control the Motor module.

Note: Flotilla modules require a Dock and Flotilla ropes (USB micro B to micro B cables)
